

UN Regional Summaries

The 193 UN Member States are grouped into 22 geographic regions. Below are one-page overviews for each region, aggregating the RTLDI metrics. For each region we show a choropleth of enclosure strength (R) for its member countries (zoomed to the region using the same Viridis scale as the global map), key aggregates (population-weighted average R, total annual bounded disparity), and a breakdown of the 9 RTLP indicators. The breakdown reports the percentage of countries in the region scoring 'Yes' on each indicator and the estimated portion of the region's total bounded disparity attributable to shortfalls on that indicator (using the current $\eta=0.30$ scaled by each country's contextual 25% cap).

Regional statistics are derived directly from the per-country 2026 atlas values (with the 25% contextual cap applied). High-impact regions (by total bounded disparity) are shown first.

Eastern Asia Region

Countries: 5 | Population: 1,614.7 million | Pop-weighted Avg R: 0.063 | Total Annual Lost GDP: \$5,466.96 billion

The Eastern Asia region has a population-weighted average RTLP score of 0.06. This cumulative measure indicates that, across its 5 member countries, roughly 6% of the nine core protections are in place on average, resulting in an estimated \$5,466.96 billion in annual lost GDP. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Japan (R=0.67), while the lowest is China (R=0.00).

Addressing the weaker indicators—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$2,154.66 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

Member Nations (RTLP R, G0 per capita, Population, total lost) — sorted by R

RTLP Indicator Breakdown for the Region

1. Existence of Legal Protections: 20% Yes (1/5) | avg raw 0.30

Attributable lost GDP: \$583.97 billion (11% of region total). Provisions explicitly protecting the right to life

2. Independent Judiciary: 0% Yes (0/5) | avg raw -0.50

Attributable lost GDP: \$718.22 billion (13% of region total). Independent judiciary capable of upholding right-to-life laws

3. Law Enforcement Accountability: 40% Yes (2/5) | avg raw 1.07

Attributable lost GDP: \$583.17 billion (11% of region total). Law enforcement agencies accountable for unlawful killings

4. Protection Against Arbitrary Detention: 60% Yes (3/5) | avg raw 0.60

Attributable lost GDP: \$520.66 billion (10% of region total). Arbitrary detention prohibited with legal recourse

5. Freedom from Torture and Inhumane Treatment: 0% Yes (0/5) | avg raw -0.13

Attributable lost GDP: \$718.22 billion (13% of region total). Measures in place to prevent torture

6. Civilian Protection in Conflict Zones: 40% Yes (2/5) | avg raw 1.07

Attributable lost GDP: \$583.17 billion (11% of region total). Mechanisms protecting civilians in conflict areas

7. Access to Justice: 60% Yes (3/5) | avg raw 0.60

Attributable lost GDP: \$520.66 billion (10% of region total). Fair access to remedies for right-to-life violations

8. Freedom of Expression and Whistleblower Protections: 60% Yes (3/5) | avg raw 0.48

Attributable lost GDP: \$520.66 billion (10% of region total). Expression and whistleblower rights upheld

9. Socioeconomic Conditions: 0% Yes (0/5) | avg raw 0.00

Attributable lost GDP: \$718.22 billion (13% of region total). Access to healthcare, food, and shelter adequate to sustain life

Critically, every single nation in the Eastern Asia region is currently failing indicator 2. Independent Judiciary. The portion of the region's bounded disparity (after the 25% cap) currently attributed to this universal shortfall is \$718.22 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of $(\eta/9 \times G_0 \times \text{pop})$ with current $\eta=0.30$. See individual nation profiles for country-level detail and 3-year trends.

Eastern Asia Region — Enclosure Strength (R)

Northern America Region

Countries: 2 | Population: 381.4 million | Pop-weighted Avg R: 0.679 | Total Annual Lost GDP: \$3,024.67 billion

The Northern America region has a population-weighted average RTLP score of 0.68. This cumulative measure indicates that, across its 2 member countries, roughly 68% of the nine core protections are in place on average, resulting in an estimated \$3,024.67 billion in annual lost GDP. The region demonstrates particular strength in Law Enforcement Accountability, Protection Against Arbitrary Detention, where a substantial share of countries satisfy the binarization thresholds for those indicators.

Addressing the weaker indicators—especially Socioeconomic Conditions, Existence of Legal Protections—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$2,066.31 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

South America Region

Countries: 12 | Population: 435.3 million | Pop-weighted Avg R: 0.421 | Total Annual Lost GDP: \$679.72 billion

The South America region has a population-weighted average RTLP score of 0.42. This cumulative measure indicates that, across its 12 member countries, roughly 42% of the nine core protections are in place on average, resulting in an estimated \$679.72 billion in annual lost GDP. The region demonstrates particular strength in Freedom of Expression and Whistleblower Protections, Protection Against Arbitrary Detention, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Chile (R=1.00), while the lowest is Venezuela (R=0.00).

Addressing the weaker indicators—especially Independent Judiciary, Freedom from Torture and Inhumane Treatment—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$388.17 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

Northern Africa Region — Enclosure Strength (R)

Australia and New Zealand Region

Countries: 2 | Population: 32.5 million | Pop-weighted Avg R: 0.796 | Total Annual Lost GDP: \$125.81 billion

The Australia and New Zealand region has a population-weighted average RTLP score of 0.80. This cumulative measure indicates that, across its 2 member countries, roughly 80% of the nine core protections are in place on average, resulting in an estimated \$125.81 billion in annual lost GDP. The region demonstrates particular strength in Existence of Legal Protections, Independent Judiciary, where a substantial share of countries satisfy the binarization thresholds for those indicators.

Addressing the weaker indicators—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$125.81 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

Australia and New Zealand Region — Enclosure Strength (R)

Eastern Africa Region

Countries: 18 | Population: 499.5 million | Pop-weighted Avg R: 0.244 | Total Annual Lost GDP: \$121.70 billion

The Eastern Africa region has a population-weighted average RTLP score of 0.24. This cumulative measure indicates that, across its 18 member countries, roughly 24% of the nine core protections are in place on average, resulting in an estimated \$121.70 billion in annual lost GDP. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Seychelles (R=0.89), while the lowest is Mozambique (R=0.00).

Addressing the weaker indicators—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$56.56 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

RTLTP Indicator Breakdown for the Region

1. Existence of Legal Protections: 0% Yes (0/13) | avg raw 0.40

Attributable lost GDP: \$7.46 billion (17% of region total). Provisions explicitly protecting the right to life

2. Independent Judiciary: 8% Yes (1/13) | avg raw 1.04

Attributable lost GDP: \$7.21 billion (17% of region total). Independent judiciary capable of upholding right-to-life laws

3. Law Enforcement Accountability: 15% Yes (2/13) | avg raw 1.61

Attributable lost GDP: \$3.07 billion (7% of region total). Law enforcement agencies accountable for unlawful killings

4. Protection Against Arbitrary Detention: 23% Yes (3/13) | avg raw 0.53

Attributable lost GDP: \$5.62 billion (13% of region total). Arbitrary detention prohibited with legal recourse

5. Freedom from Torture and Inhumane Treatment: 8% Yes (1/13) | avg raw 1.05

Attributable lost GDP: \$7.21 billion (17% of region total). Measures in place to prevent torture

6. Civilian Protection in Conflict Zones: 15% Yes (2/13) | avg raw 1.61

Attributable lost GDP: \$3.07 billion (7% of region total). Mechanisms protecting civilians in conflict areas

7. Access to Justice: 23% Yes (3/13) | avg raw 0.53

Attributable lost GDP: \$5.62 billion (13% of region total). Fair access to remedies for right-to-life violations

8. Freedom of Expression and Whistleblower Protections: 38% Yes (5/13) | avg raw 0.75

Attributable lost GDP: \$0.69 billion (2% of region total). Expression and whistleblower rights upheld

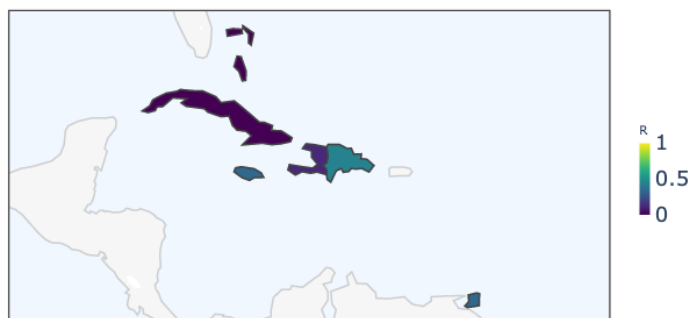

9. Socioeconomic Conditions: 8% Yes (1/13) | avg raw 0.00

Attributable lost GDP: \$3.32 billion (8% of region total). Access to healthcare, food, and shelter adequate to sustain life

Critically, every single nation in the Caribbean region is currently failing indicator 1. Existence of Legal Protections. The portion of the region's bounded disparity (after the 25% cap) currently attributed to this universal shortfall is \$7.46 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of $(\eta/9 \times G_0 \times \text{pop})$ with current $\eta=0.30$. See individual nation profiles for country-level detail and 3-year trends.

Caribbean Region — Enclosure Strength (R)

Melanesia Region

Countries: 4 | Population: 12.7 million | Pop-weighted Avg R: 0.355 | Total Annual Lost GDP: \$7.62 billion

The Melanesia region has a population-weighted average RTLP score of 0.36. This cumulative measure indicates that, across its 4 member countries, roughly 36% of the nine core protections are in place on average, resulting in an estimated \$7.62 billion in annual lost GDP. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Fiji (R=0.56), while the lowest is Papua New Guinea (R=0.33).

Addressing the weaker indicators—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$4.05 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

Member Nations (RTLP R, G0 per capita, Population, total lost) — sorted by R

Country	R	G0 (\$)	Pop	Lost (\$)
Fiji	0.56	6,426	0.9m	\$796m
Vanuatu	0.56	3,411	0.3m	\$149m

Solomon Islands	0.33	1,934	0.8m	\$317m
REGIONAL TOTAL	0.36		12.7m	\$7.62b

RTLP Indicator Breakdown for the Region

1. Existence of Legal Protections: 0% Yes (0/4) | avg raw 0.79

Attributable lost GDP: \$1.35 billion (18% of region total). Provisions explicitly protecting the right to life

2. Independent Judiciary: 0% Yes (0/4) | avg raw 1.39

Attributable lost GDP: \$1.35 billion (18% of region total). Independent judiciary capable of upholding right-to-life laws

3. Law Enforcement Accountability: 50% Yes (2/4) | avg raw 2.06

Attributable lost GDP: \$1.11 billion (15% of region total). Law enforcement agencies accountable for unlawful killings

4. Protection Against Arbitrary Detention: 100% Yes (4/4) | avg raw 0.84

Attributable lost GDP: \$0.00 billion (0% of region total). Arbitrary detention prohibited with legal recourse

5. Freedom from Torture and Inhumane Treatment: 0% Yes (0/4) | avg raw 1.18

Attributable lost GDP: \$1.35 billion (18% of region total). Measures in place to prevent torture

6. Civilian Protection in Conflict Zones: 50% Yes (2/4) | avg raw 2.06

Attributable lost GDP: \$1.11 billion (15% of region total). Mechanisms protecting civilians in conflict areas

7. Access to Justice: 100% Yes (4/4) | avg raw 0.84

Attributable lost GDP: \$0.00 billion (0% of region total). Fair access to remedies for right-to-life violations

8. Freedom of Expression and Whistleblower Protections: 100% Yes (4/4) | avg raw 0.82

Attributable lost GDP: \$0.00 billion (0% of region total). Expression and whistleblower rights upheld

9. Socioeconomic Conditions: 0% Yes (0/4) | avg raw 0.00

Attributable lost GDP: \$1.35 billion (18% of region total). Access to healthcare, food, and shelter adequate to sustain life

Critically, every single nation in the Melanesia region is currently failing indicator 1. Existence of Legal Protections. The portion of the region's bounded disparity (after the 25% cap) currently attributed to this universal shortfall is \$1.35 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of $(\eta/9 \times G_0 \times \text{pop})$ with current $\eta=0.30$. See individual nation profiles for country-level detail and 3-year trends.

Melanesia Region — Enclosure Strength (R)

Polynesia Region

Countries: 4 | Population: 0.3 million | Pop-weighted Avg R: 0.000 | Total Annual Lost GDP: \$0.50 billion

The Polynesia region has a population-weighted average RTLP score of 0.00. This cumulative measure indicates that, across its 4 member countries, roughly 0% of the nine core protections are in place on average, resulting in an estimated \$0.50 billion in annual lost GDP. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Samoa (R=0.00), while the lowest is Samoa (R=0.00).

Addressing the weaker indicators—especially Freedom of Expression and Whistleblower Protections, Socioeconomic Conditions—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$0.17 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Critically, every single nation in the Polynesia region is currently failing indicator 1. Existence of Legal Protections. The portion of the region's bounded disparity (after the 25% cap) currently attributed to this universal shortfall is \$0.06 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of $(\eta/9 \times G_0 \times \text{pop})$ with current $\eta=0.30$. See individual nation profiles for country-level detail and 3-year trends.

Polynesia Region — Enclosure Strength (R)

Micronesia Region

Countries: 4 | Population: 0.3 million | Pop-weighted Avg R: 0.049 | Total Annual Lost GDP: \$0.34 billion

The Micronesia region has a population-weighted average RTLP score of 0.05. This cumulative measure indicates that, across its 4 member countries, roughly 5% of the nine core protections are in place on average, resulting in an estimated \$0.34 billion in annual lost GDP. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. The highest-scoring nation is Kiribati ($R=0.11$), while the lowest is Micronesia, Fed. Sts. ($R=0.00$).

Addressing the weaker indicators—especially Access to Justice, Freedom of Expression and Whistleblower Protections—is associated with the largest slices of the region's current bounded disparity (after the 25% institutional-share cap). The cross-sectional association links improvement on these protections to a reduction in disparity of roughly \$0.12 billion annually for the region as a whole (within the contextual bound). Whether and how much of that association is realizable depends on the other determinants of output (industry structure, resources, human capital, history) that the template explicitly credits.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).
