RTLDI ATLAS 2026

Right to Life Deficit Index for United Nations Member States

Identifying capital exclusions: lost potential GDP associated with missing foundational protections. Contextually bounded with a 25% institutional cap.

GLOBAL CAPITAL EXCLUSIONS	UN MEMBER STATES	COEFFICIENT ETA
$15.87T	193	0.30
annual, capped	22 regions	population-weighted

Based on Sid J.A. Hubbard, Causality and Attraction: A Continuum of Steady States (Version 3, May 2026), DOI 10.5281/zenodo.19468550

Data: V-Dem 2024 components + latest World Bank GDP baseline as of 2026. Prepared for NGOs, researchers, policymakers, analysts, and public-interest users.

Executive Description

The RTLDI — Right to Life Deficit Index — is taken from the source framework (Hubbard, Zenodo 10.5281/zenodo.19468550) and extended here so that the world can see and capture the lost potential GDP caused by missing protections.

We call this lost potential GDP "capital exclusions": places and economies where capital is excluded from productive use because the nine foundational protections necessary for it to operate safely are not present. The RTLDI shows that the global economy currently has approximately 15 trillion dollars in capital exclusions sitting outside the economy — waiting for nations to decide to put the necessary protections in place.

This 2026 Atlas applies the source RTLDI to all 193 UN Member States using V-Dem (2024 components) and the most recent World Bank GDP per capita data. Through population-weighted regression analysis of countries that have these protections versus those that do not, and with a conservative 25% attribution (the portion of observed national wealth associated with the institutional capacity to protect life and capital), the atlas quantifies the scale of these exclusions. The nine levers are low-cost, high-return institutional conditions. Activating them is how nations can bring excluded capital back into the economy.

This is practical economic intelligence. The findings are not judgments on nations but measurements of where specific, actionable protections correspond to large capital exclusions (lost potential GDP). The nine levers and the method behind the extension are described in the sections that follow.

Methodology and Data Sources

RTLP Score (R)
R is the simple average of nine binary indicators (0 = no protection, 1 = full protection). Eight indicators are derived from V-Dem v15 (2024 data) using the following thresholds (higher = stronger protection):

1. Legal Protections — v2cltrnslw ≥ 2.0
2. Independent Judiciary — average(v2juhcind, v2juncind) ≥ 2.0
3. Law Enforcement Accountability — v2clkill ≥ 2.0
4. Protection Against Arbitrary Detention — v2xcl_acjst ≥ 0.5
5. Freedom from Torture — v2cltort ≥ 2.0
6. Civilian Protection in Conflict — v2x_clphy (physical violence index) ≥ 0.5
7. Access to Justice — v2clrspct (rigorous impartial admin) ≥ 2.0
8. Freedom of Expression & Whistleblower Protections — v2x_freexp ≥ 0.5

9. Socioeconomic Conditions — World Bank: undernourishment ≤ 5 % AND poverty headcount ($2.15) ≤ 10 %.

R = (number of 'Yes' indicators) / 9

Economic Projection
ΔG (per-capita) = min($\eta \times (1 - R) \times G_0$, $0.25 \times G_0$) with $\eta \approx 0.30$ (the 25% cap from the regression). G_0 is the most recent published GDP per capita (World Bank, labeled 2026 baseline). Total capital exclusions = $\Delta G \times$ population.

Data Vintage Note for 2026 Edition
V-Dem components reflect the latest available year in the source file (2024). GDP per capita (G_0) uses the freshest published values available at the time of atlas production. This follows the principle that RTLP governance scores are relatively stable year-to-year while GDP is the more dynamic variable in the equation.

Nested Causal Modelling/Mapping

The RTLDI in this atlas begins with the source framework (Hubbard, Zenodo DOI 10.5281/zenodo.19468550) and extends it through population-weighted regression on the full UN cross-section. The target is to quantify "capital exclusions" — the lost potential GDP that exists because the nine foundational protections required for capital to operate safely are not present.

R (0.0 to 1.0) is the simple average of the nine binary indicators from the source. The model is verified by the strong population-weighted correlation between higher R and higher observed GDP. A conservative 25% attribution cap is applied so that no more than one-quarter of any nation's observed wealth is credited to these institutional conditions (the raw regression suggests a higher coefficient, closer to 0.33).

The nine conditions function as the institutional prerequisites that allow capital to enter and remain in an economy without unacceptable risk of arbitrary loss. Where they are absent, capital is excluded. The RTLDI extension makes the scale of these exclusions visible so that nations can see the concrete economic opportunity in putting the protections in place.

Using the RTLDI to Identify Capital Exclusions

This atlas extends the source RTLDI to make visible the capital exclusions — the lost potential GDP — that result when the nine protections are not in place. The global total is on the order of 15 trillion dollars sitting outside productive economic activity.

Governments, investors, and analysts can use the R scores and the 9-component breakdowns to see exactly where specific, low-cost institutional changes correspond to large volumes of currently excluded capital. Activating the levers is how that capital can be brought back into the economy.

The Core Translation

The bounded equation is $\Delta G = \min(\eta \times (1 - R) \times G_0 , 0.25 \times G_0)$ with $\eta \approx 0.30$ from the population-weighted 2026 cross-section.

R is the average of the nine binary indicators from the source RTLDI. G_0 is GDP per capita. ΔG is the estimated per-person capital exclusion (lost potential GDP) associated with the current level of these protections (capped so the nine indicators are never credited with more than 25% of observed G_0 after other factors are given their due). Total capital exclusions $\approx \Delta G \times$ population.

A country with R = 0.44 and G_0 = \$10,000 shows roughly \$1,512 per person per year in capital exclusions under the current cross-sectional relationship (0.30 × 0.56 × 10,000). The 25% cap is the conservative adjustment from the population-weighted regression. The figure is the measured volume of capital currently excluded from that economy — the potential GDP that can be brought back in once the protections are in place.

The Nine Levers

Each lever is a simple binary condition — either present or absent. When present, it removes a barrier that otherwise excludes capital from the economy. The nine levers were identified by the source modelling (extended here via population-weighted regression) with the target of maximal economic scale. Activating them is how nations can reduce capital exclusions and bring excluded GDP back into productive use.

1. Legal Protections
Present when ordinary law is applied consistently to state agents as well as everyone else. These protections represent opportunities to support greater economic scale by lowering the risk of arbitrary loss; people and businesses invest and trade more when rules are known and fairly enforced. Annual cost is low.

2. Independent Judiciary
Present when judges are protected from political pressure so they rule according to law. These protections represent opportunities for contracts and property rights to be reliable for everyone. Annual cost is low.

3. Law Enforcement Accountability
Present when police and security forces are investigated and punished when they break the law. These protections represent opportunities for people to travel, work, and invest with greater security. Annual cost is low.

4. Protection Against Arbitrary Detention
Present when no one can be held without charge, time limits, or judicial review. These protections represent opportunities to protect continuity of talent and enterprise. Annual cost is low.

5. Freedom from Torture
Present when torture is a crime with no exceptions and evidence obtained by it is excluded. These protections represent opportunities to build social trust and accurate information flows. Annual cost is low.

6. Civilian Protection in Conflict
Present when armed forces distinguish civilians from combatants and are held accountable. These protections represent opportunities to preserve human and physical capital for recovery. Annual cost is training and accountability.

7. Access to Justice
Present when ordinary people can bring serious claims against the powerful and have them heard. These protections represent opportunities for contracts and rights to be meaningful for everyone. Annual cost is legal aid and court capacity.

8. Freedom of Expression & Whistleblower Protections
Present when laws protect people who report government corruption from retaliation. These protections represent opportunities for corruption to be exposed and stopped, public money to go further, and investors to see lower risk. Annual cost is low — mainly passing and enforcing the law. When the law protects whistleblowers, the whistles blow and tell you where the corruption is.

9. Commitment to Basic Human Security
Present when a society deliberately sets and maintains a floor against extreme deprivation (through nutrition, basic health access, and minimal material security). This is a measurable expression of political will and institutional priority. When present, it expands the share of the population that can participate productively in the economy, increasing overall scale and velocity. Annual cost is a fiscal and political choice about minimum security standards.

These nine work together as a system of low-cost, high-return institutional conditions. Societies that activate more of them consistently realize greater economic scale and velocity.

How the Levers Work in Practice

Each lever is either present or absent. When present, it removes a barrier that otherwise excludes capital from the economy. The nine levers come from the source RTLDI and are extended here so the volume of capital exclusions (lost potential GDP) associated with each missing lever becomes visible.

Governments, investors, and analysts can use the R score and the 9-component breakdown as practical economic intelligence: identify which levers are not yet activated in a jurisdiction and see the corresponding scale of excluded capital that could be brought back in once the protections are in place. The levers are low-cost relative to the GDP they help unlock.

Practical Use

For national policymakers: Open your profile. Note your R and the specific levers that are not yet activated. Compare the total annual capital exclusions (lost potential GDP) in your jurisdiction to relevant budgets. Ask the civil service to cost the effort required to activate one or two levers and the volume of excluded capital that could be brought back into the economy.

For civil society and media: Use the numbers in domestic advocacy to highlight the opportunity. 'We have $2.3 billion in capital exclusions every year associated with law enforcement accountability. That is more than the entire health budget. Here is one change that can bring that excluded capital back in.'

For citizens: The data is public. When leaders promise 'development,' ask which of the nine protections they will strengthen and how we will know in four years whether R has moved — and what capital exclusions that could eliminate.

For international actors: Target governance and security assistance to the specific levers that currently show the largest capital exclusions in that country.

Limitations

R uses 2024 V-Dem data paired with the freshest published GDP figures. Binarization thresholds are modeling choices; always examine the raw values. The 25 % cap is a deliberate conservative adjustment from the population-weighted regression on the UN cross-section (raw analysis suggests a higher coefficient, closer to 0.33). The identity of the levers with the largest associated capital exclusions is more robust than the precise dollar figure. The atlas quantifies the scale of exclusions based on the source RTLDI; whether and how much capital returns when protections are strengthened depends on many other factors.

Cartographic Approach and the Nested Map

All choropleths use the Mollweide equal-area projection via standard tools. This ensures accurate area representation, full reproducibility, and accessibility for NGOs. The maps are generated once and embedded in the PDF so that every reader sees the same visual data.

Canonical Global Choropleth — Enclosure Strength (R)

Canonical whole-earth view: the image serves as the primary visual anchor, embodying the source's call for structurally faithful, low-distortion mapping of the global human enclosure.

Mollweide equal-area projection. Primary anchor for accuracy and nested wholeness (source Ch. 2). Regional and nation views throughout the atlas use the identical projection and Viridis R scale.

GLOBAL CAPITAL EXCLUSIONS BY LEVER

#	Indicator (RTLP)	Annual Capital Exclusions	% total
5	Freedom from Torture and Inhumane Trea	$2,904.4 bn	18.3%
	Measures in place to prevent torture		
2	Independent Judiciary	$2,827.6 bn	17.8%
	Independent judiciary capable of upholding right-to-life laws		
1	Existence of Legal Protections	$2,782.5 bn	17.5%
	Provisions explicitly protecting the right to life		
9	Socioeconomic Conditions	$1,716.6 bn	10.8%
	Access to healthcare, food, and shelter adequate to sustain life		
3	Law Enforcement Accountability	$1,359.0 bn	8.6%
	Law enforcement agencies accountable for unlawful killings		
6	Civilian Protection in Conflict Zones	$1,359.0 bn	8.6%
	Mechanisms protecting civilians in conflict areas		
4	Protection Against Arbitrary Detention	$976.7 bn	6.2%
	Arbitrary detention prohibited with legal recourse		
7	Access to Justice	$976.7 bn	6.2%
	Fair access to remedies for right-to-life violations		
8	Freedom of Expression and Whistleblowe	$965.7 bn	6.1%
	Expression and whistleblower rights upheld		

These figures paint a picture of a world where the greatest measured disparities are associated with failures to prevent torture and inhumane treatment and to ensure independent judiciaries and basic legal protections—together accounting for a large share of the bounded global total. Strengths appear in freedom of expression/whistleblowing and access to justice/arbitrary detention, where the associated disparities are comparatively lower. Socioeconomic shortfalls remain a persistent burden. After applying the contextual cap derived from case studies of archetypal nations, the data show how weaknesses in the nine core protections are linked to substantial differences in prosperity once other determinants (resources, industry, history, location) are credited.

Total global capital exclusions: $15.87 trillion. This is lost potential GDP sitting outside the economy because the nine protections are not present.

Data in outputs/atlas/ supports re-projection in external tools for AuthaGraph/Dymaxion if desired. See source Ch. 2 and Epilogue on maps and nested causality (DOI 10.5281/zenodo.19468550).

UN Regional Summaries

The 193 UN Member States are grouped into 22 geographic regions. Below are one-page overviews for each region, aggregating the RTLDI metrics. For each region we show a choropleth of enclosure strength (R) for its member countries (zoomed to the region using the same Viridis scale as the global map), key aggregates (population-weighted average R, total annual capital exclusions), and a breakdown of the 9 RTLP indicators. The breakdown reports the percentage of countries in the region scoring 'Yes' on each indicator and the estimated portion of the region's total capital exclusions attributable to shortfalls on that indicator (using the current η=0.30 scaled by each country's contextual 25% cap).

Regional statistics are derived directly from the per-country 2026 atlas values (with the 25% contextual cap applied). Regions with the largest capital exclusions are shown first.

UN REGIONAL SUMMARY

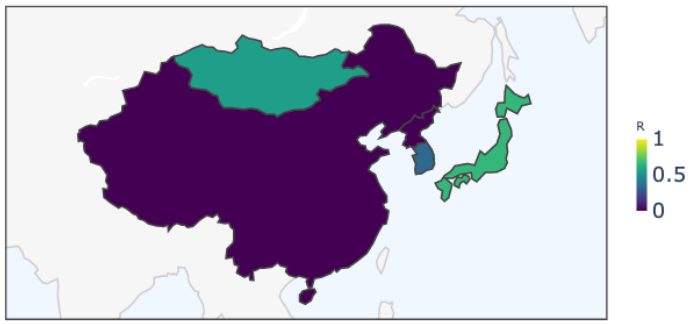

Eastern Asia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
5	1,614.7m	0.06	$5,467.0B

The Eastern Asia region has a population-weighted average RTLP score of 0.06. This cumulative measure indicates that, across its 5 member countries, roughly 6% of the nine core protections are in place on average, corresponding to an estimated $5,466.96 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $2,154.66 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

Eastern Asia Region — Enclosure Strength (R)

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

RTLP INDICATOR BREAKDOWN FOR THE REGION

1. Existence of Legal Protections: 20% Yes (1/5) | avg raw 0.30
   Associated capital exclusions: $583.97 billion (11% of region total). Provisions explicitly protecting the right to life
2. Independent Judiciary: 0% Yes (0/5) | avg raw -0.50
   Associated capital exclusions: $718.22 billion (13% of region total). Independent judiciary capable of upholding right-to-life laws
3. Law Enforcement Accountability: 40% Yes (2/5) | avg raw 1.07
   Associated capital exclusions: $583.17 billion (11% of region total). Law enforcement agencies accountable for unlawful killings
4. Protection Against Arbitrary Detention: 60% Yes (3/5) | avg raw 0.60
   Associated capital exclusions: $520.66 billion (10% of region total). Arbitrary detention prohibited with legal recourse
5. Freedom from Torture and Inhumane Treatment: 0% Yes (0/5) | avg raw -0.13
   Associated capital exclusions: $718.22 billion (13% of region total). Measures in place to prevent torture
6. Civilian Protection in Conflict Zones: 40% Yes (2/5) | avg raw 1.07
   Associated capital exclusions: $583.17 billion (11% of region total). Mechanisms protecting civilians in conflict areas
7. Access to Justice: 60% Yes (3/5) | avg raw 0.60
   Associated capital exclusions: $520.66 billion (10% of region total). Fair access to remedies for right-to-life violations
8. Freedom of Expression and Whistleblower Protections: 60% Yes (3/5) | avg raw 0.48
   Associated capital exclusions: $520.66 billion (10% of region total). Expression and whistleblower rights upheld
9. Socioeconomic Conditions: 0% Yes (0/5) | avg raw 0.00
   Associated capital exclusions: $718.22 billion (13% of region total). Access to healthcare, food, and shelter adequate to sustain life

Critically, every single nation in the Eastern Asia region is currently failing indicator 2. Independent Judiciary. The portion of the region's capital exclusions (after the 25% cap) associated with this lever is $718.22 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of ($\eta/9 \times G_0 \times$ pop) with current η=0.30. See individual nation profiles for country-level detail and 3-year trends.

UN REGIONAL SUMMARY

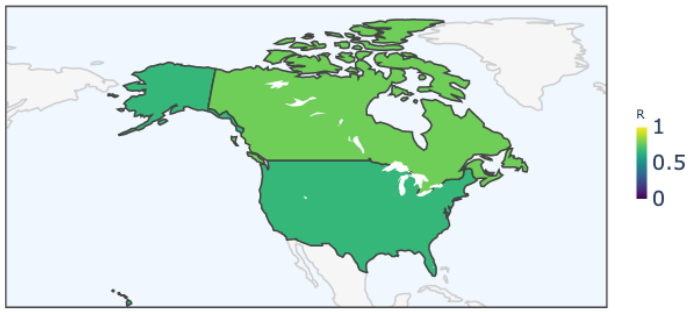

Northern America

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
2	381.4m	0.68	$3,024.7B

The Northern America region has a population-weighted average RTLP score of 0.68. This cumulative measure indicates that, across its 2 member countries, roughly 68% of the nine core protections are in place on average, corresponding to an estimated $3,024.67 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Law Enforcement Accountability, Protection Against Arbitrary Detention, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Socioeconomic Conditions, Existence of Legal Protections—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $2,066.31 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

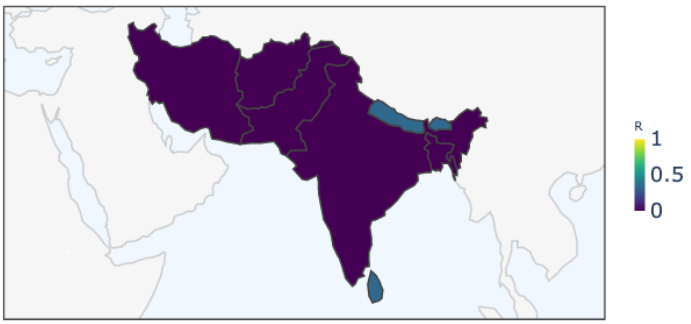

Southern Asia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
9	2,062.9m	0.01	$1,336.5B

The Southern Asia region has a population-weighted average RTLP score of 0.01. This cumulative measure indicates that, across its 9 member countries, roughly 1% of the nine core protections are in place on average, corresponding to an estimated $1,336.51 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Civilian Protection in Conflict Zones, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $450.57 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

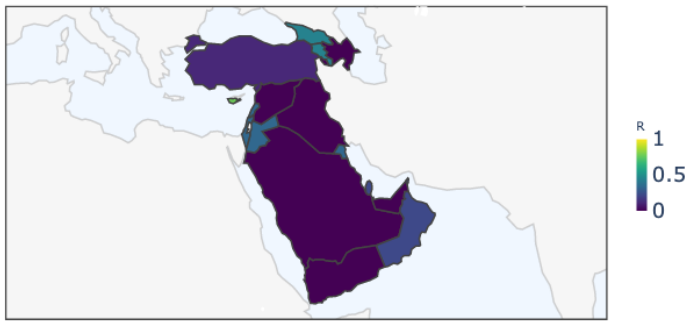

Western Asia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
17	303.4m	0.09	$1,132.6B

The Western Asia region has a population-weighted average RTLP score of 0.09. This cumulative measure indicates that, across its 17 member countries, roughly 9% of the nine core protections are in place on average, corresponding to an estimated $1,132.57 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Existence of Legal Protections, Independent Judiciary—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $429.75 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

Eastern Europe

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
10	280.9m	0.31	$798.9B

The Eastern Europe region has a population-weighted average RTLP score of 0.31. This cumulative measure indicates that, across its 10 member countries, roughly 31% of the nine core protections are in place on average, corresponding to an estimated $798.94 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Existence of Legal Protections, Independent Judiciary—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $410.18 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

4. Protection Against Arbitrary Detention: 80% Yes (8/10) | avg raw 0.66
   Associated capital exclusions: $68.89 billion (9% of region total). Arbitrary detention prohibited with legal recourse
5. Freedom from Torture and Inhumane Treatment: 20% Yes (2/10) | avg raw 0.89
   Associated capital exclusions: $128.12 billion (16% of region total). Measures in place to prevent torture
6. Civilian Protection in Conflict Zones: 60% Yes (6/10) | avg raw 1.68
   Associated capital exclusions: $79.47 billion (10% of region total). Mechanisms protecting civilians in conflict areas
7. Access to Justice: 80% Yes (8/10) | avg raw 0.66
   Associated capital exclusions: $68.89 billion (9% of region total). Fair access to remedies for right-to-life violations
8. Freedom of Expression and Whistleblower Protections: 70% Yes (7/10) | avg raw 0.63
   Associated capital exclusions: $75.70 billion (9% of region total). Expression and whistleblower rights upheld
9. Socioeconomic Conditions: 70% Yes (7/10) | avg raw 0.00
   Associated capital exclusions: $16.34 billion (2% of region total). Access to healthcare, food, and shelter adequate to sustain life

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of ($\eta/9 \times G_0 \times$ pop) with current η=0.30. See individual nation profiles for country-level detail and 3-year trends.

UN REGIONAL SUMMARY

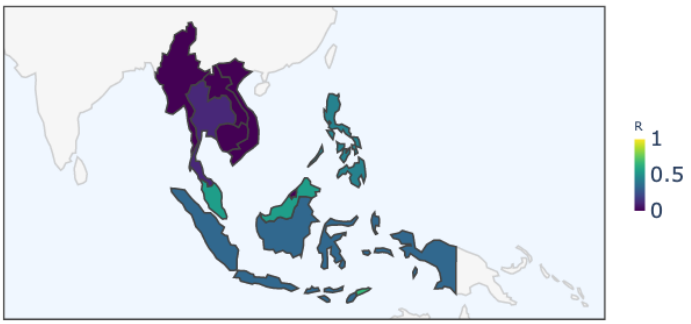

South-eastern Asia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
11	695.4m	0.26	$756.2B

The South-eastern Asia region has a population-weighted average RTLP score of 0.26. This cumulative measure indicates that, across its 11 member countries, roughly 26% of the nine core protections are in place on average, corresponding to an estimated $756.21 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Existence of Legal Protections, Independent Judiciary—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $334.60 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

Northern Europe

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
10	108.9m	0.78	$375.4B

The Northern Europe region has a population-weighted average RTLP score of 0.78. This cumulative measure indicates that, across its 10 member countries, roughly 78% of the nine core protections are in place on average, corresponding to an estimated $375.37 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Law Enforcement Accountability, Protection Against Arbitrary Detention, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Existence of Legal Protections, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $372.54 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

7. Access to Justice: 100% Yes (10/10) | avg raw 0.95
   Associated capital exclusions: $0.00 billion (0% of region total). Fair access to remedies for right-to-life violations
8. Freedom of Expression and Whistleblower Protections: 100% Yes (10/10) | avg raw 0.94
   Associated capital exclusions: $0.00 billion (0% of region total). Expression and whistleblower rights upheld
9. Socioeconomic Conditions: 80% Yes (8/10) | avg raw 0.00
   Associated capital exclusions: $123.98 billion (33% of region total). Access to healthcare, food, and shelter adequate to sustain life

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of ($\eta/9 \times G_0 \times$ pop) with current η=0.30. See individual nation profiles for country-level detail and 3-year trends.

UN REGIONAL SUMMARY

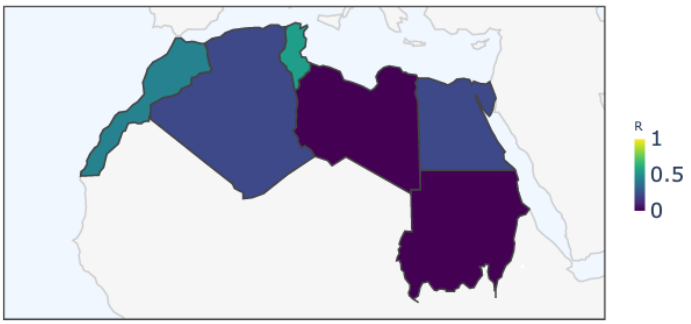

Northern Africa

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
6	271.5m	0.22	$211.4B

The Northern Africa region has a population-weighted average RTLP score of 0.22. This cumulative measure indicates that, across its 6 member countries, roughly 22% of the nine core protections are in place on average, corresponding to an estimated $211.37 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $94.97 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of ($\eta/9 \times G_0 \times$ pop) with current η=0.30. See individual nation profiles for country-level detail and 3-year trends.

UN REGIONAL SUMMARY

Central Asia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
5	82.3m	0.08	$121.5B

The Central Asia region has a population-weighted average RTLP score of 0.08. This cumulative measure indicates that, across its 5 member countries, roughly 8% of the nine core protections are in place on average, corresponding to an estimated $121.50 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Freedom from Torture and Inhumane Treatment, Civilian Protection in Conflict Zones—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $42.28 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

Middle Africa

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
9	212.9m	0.14	$67.6B

The Middle Africa region has a population-weighted average RTLP score of 0.14. This cumulative measure indicates that, across its 9 member countries, roughly 14% of the nine core protections are in place on average, corresponding to an estimated $67.57 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Freedom of Expression and Whistleblower Protections, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Civilian Protection in Conflict Zones, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $28.18 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

8. Freedom of Expression and Whistleblower Protections: 67% Yes (6/9) | avg raw 0.52
   Associated capital exclusions: $1.33 billion (2% of region total). Expression and whistleblower rights upheld
9. Socioeconomic Conditions: 0% Yes (0/9) | avg raw 0.00
   Associated capital exclusions: $9.39 billion (14% of region total). Access to healthcare, food, and shelter adequate to sustain life

Critically, every single nation in the Middle Africa region is currently failing indicator 2. Independent Judiciary. The portion of the region's capital exclusions (after the 25% cap) associated with this lever is $9.39 billion.

Note: Weighted R is population-weighted mean of member countries' R. Attributable lost for an indicator = sum over countries with 'No' on that indicator of ($\eta/9 \times G_0 \times$ pop) with current η=0.30. See individual nation profiles for country-level detail and 3-year trends.

UN REGIONAL SUMMARY

Caribbean

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
13	39.7m	0.20	$43.3B

The Caribbean region has a population-weighted average RTLP score of 0.20. This cumulative measure indicates that, across its 13 member countries, roughly 20% of the nine core protections are in place on average, corresponding to an estimated $43.28 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Socioeconomic Conditions, Existence of Legal Protections—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $17.99 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

Melanesia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
4	12.7m	0.36	$7.6B

The Melanesia region has a population-weighted average RTLP score of 0.36. This cumulative measure indicates that, across its 4 member countries, roughly 36% of the nine core protections are in place on average, corresponding to an estimated $7.62 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in Protection Against Arbitrary Detention, Access to Justice, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Freedom from Torture and Inhumane Treatment, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $4.05 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

UN REGIONAL SUMMARY

Polynesia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
4	0.3m	0.00	$0.5B

The Polynesia region has a population-weighted average RTLP score of 0.00. This cumulative measure indicates that, across its 4 member countries, roughly 0% of the nine core protections are in place on average, corresponding to an estimated $0.50 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Freedom of Expression and Whistleblower Protections, Socioeconomic Conditions—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $0.17 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

UN REGIONAL SUMMARY

Micronesia

COUNTRIES	POPULATION	WEIGHTED R	CAPITAL EXCLUSIONS
4	0.3m	0.05	$0.3B

The Micronesia region has a population-weighted average RTLP score of 0.05. This cumulative measure indicates that, across its 4 member countries, roughly 5% of the nine core protections are in place on average, corresponding to an estimated $0.34 billion in capital exclusions (lost potential GDP) annually. The region demonstrates particular strength in several key areas, where a substantial share of countries satisfy the binarization thresholds for those indicators. These protections represent opportunities to support greater economic scale for life and capital.

Strengthening the areas with lower implementation—especially Access to Justice, Freedom of Expression and Whistleblower Protections—is associated with the largest opportunities for realizing additional scale in the region (after the 25% contextual bound). The cross-sectional association links stronger protections to greater economic scale of roughly $0.12 billion annually for the region as a whole (within the bound). Whether and how much of that association is realized depends on the other determinants of output (industry structure, resources, human capital, history) that the model explicitly accounts for by bounding the contribution of these nine factors.

Mollweide projection (equal-area, same Viridis R scale as global choropleth).

Data Attribution and Sources

Primary Data

• V-Dem (Varieties of Democracy) Country-Year Full+Others, version 15 (2024 data release). Indicators used: v2cltrnslw, v2juhcind, v2juncind, v2clkill, v2cltort, v2xcl_acjst, v2x_freexp, v2x_clphy, v2clrspct.

• World Bank World Development Indicators (WDI) via API — GDP per capita (current US$), population, prevalence of undernourishment, and poverty headcount at $2.15 (2017 PPP). Values are the most recent published as of atlas production (labeled 2026 baseline).

• United Nations Member States list (193 sovereign states) for country scope and ISO3 codes.

Source Framework

The RTLDI equation, the nine RTLP indicators, and the nested causal interpretation are taken from:
Sid J.A. Hubbard, Causality and Attraction: A Continuum of Steady States (Version 3, May 2026), DOI: 10.5281/zenodo.19468550. The operational crosswalk and binarization thresholds used here are documented in docs/indicator_crosswalk.md of this project.

This PDF was generated programmatically from the open RTLDI ATLAS toolkit. No proprietary or restricted data were used.

RTLDI Atlas Suite and Public Repository

This PDF atlas was produced by the RTLDI Atlas Suite, the open repository that contains the canonical data crosswalks, Python build pipeline, choropleth map generation, PDF ebook generator, and self-contained HTML atlas generator used for the public release.

Repository: https://github.com/SJAH9/rtldi-atlas

Users of this atlas are invited to download the RTLDI Atlas Suite and reproduce the published RTLP scores and RTLDI capital-exclusion projections directly from the public-release V-Dem and World Bank datasets. The suite is designed so NGOs, researchers, policymakers, analysts, and investors can rerun the atlas as new public data releases become available.

The same tools can also be used to generate an RTLDI Atlas from proprietary, internal, or field data. The implementation separates the conceptual nine-lever RTLDI model from the data crosswalk: if an organization has its own trusted country, regional, sectoral, or subnational indicators, it can map those fields into the required nine binary RTLP components and then use the existing suite to compute R, per-capita ΔG, total capital exclusions, lever-level attribution, regional summaries, maps, spreadsheets, PDF reports, and HTML outputs.

For public-data runs, use the documented V-Dem and World Bank workflow. For proprietary-data runs, implement a clear data crosswalk, preserve the nine RTLP component meanings, document all thresholds, and keep the output labels tied to the same canonical RTLDI equation. This keeps forks comparable while allowing local datasets to improve coverage, timeliness, or granularity.

The official public atlas has one canonical pipeline: src.build_atlas produces the master atlas table; src.generate_atlas_ebook.prepare_atlas_data() prepares the shared print/web data; and the PDF/HTML generators consume that same prepared data. Forks should preserve this single-pipeline discipline or clearly identify themselves as experimental derivatives.

Nested Causal Modelling

The atlas takes the RTLDI from the source document and extends it via population-weighted regression (25% cap) to quantify capital exclusions — the lost potential GDP where capital is excluded from the economy because the nine protections required for it to operate are not present. The nine levers are the conditions from the source modelling. Their descriptions and the scale of exclusions associated with each are given in the front-matter section. The 25 % cap is a practical limiter on projections; the levers are low-cost conditions whose activation can bring excluded capital back in.

Index of Terms

2026-fresh G0:
: The most recent published GDP per capita values used as the dynamic baseline for the 2026 edition (even when RTLP components are from 2024).

Access to Justice:
: Fair access to remedies for right-to-life violations

Arbitrary Detention:
: Core protection against state overreach (RTLP indicator #4); current implementation level contributes to associated capital exclusions in regions.

Attributable capital exclusions:
: The share of a country or region's total capital exclusions (lost potential GDP) that is directly traceable to the current implementation level of one specific protection (sum of $\eta/9 \times G_0 \times$ pop over countries where the protection is not fully present, with current $\eta \approx 0.30$ from population-weighted cross-section).

Binarization / threshold:
: The documented conversion of continuous V-Dem and World Bank values into the binary 0/1 scores for the nine indicators (e.g., ≥2.0 on 0-4 scales, ≤5 % undernourishment + ≤10 % poverty for #9).

Causality and Attraction:
: The source monograph (Hubbard 2026V3, Zenodo 19468550) that supplies the RTLDI equation, the nine RTLP indicators, the nested-enclosures paradigm, and the cartographic critique of distortion. This atlas extends the source RTLDI to quantify capital exclusions.

Choropleth:
: Thematic map in which countries or regions are shaded by enclosure strength R (0–1) using the Viridis colormap; primary visual for the global, regional, and focus views.

Civilian Protection in Conflict Zones:
: Mechanisms protecting civilians in conflict areas

Country view:
: The country-only choropleth on each nation page, fitted to the national boundary and shaded by enclosure strength R without using the regional context map.

Crosswalk:
: The explicit mapping from the nine verbatim RTLP questions to observable V-Dem variables and World Bank statistics, with defined binarization thresholds.

ΔG (delta G):
: Annual per-capita capital exclusions (lost potential GDP) associated with the current level of the nine levers. Core output of the RTLDI equation.

Economic Intelligence (tool):
: The use of R scores, component breakdowns, and attributable capital exclusions figures as practical information for governments, businesses, and analysts to identify high-leverage institutional opportunities.

Enclosure (nested causal / human):
: The source document's central metaphor: the interdependent, layered structures of protection whose strength or weakness shapes higher-order economic and social steady states.

η (eta):
: The sensitivity coefficient (current data-driven default 0.30 from population-weighted 2026 UN cross-section). In the bounded model $\Delta G = \min(\eta(1 - R) \times G_0, 0.25 \times G_0)$; the cross-sectional premium per indicator, then capped so the nine RTLP indicators are never credited with more than 25% of observed G_0 after other determinants are given due weight. (Source document used a more conservative 0.05 structural value.)

Existence of Legal Protections:
: Provisions explicitly protecting the right to life

Freedom from Torture and Inhumane Treatment:
: Measures in place to prevent torture

Freedom of Expression and Whistleblower Protections:
: Expression and whistleblower rights upheld

G_0 (G-zero):
: Baseline GDP per capita (World Bank, current US$). The 'current' economic size against which capital exclusions are measured.

Independent Judiciary:
: Independent judiciary capable of upholding right-to-life laws

Law Enforcement Accountability:
: Law enforcement agencies accountable for unlawful killings

Member-nations table:
: The compact table on each regional summary page that lists every country in the region together with its R, G0, population, and capital exclusions, plus a bottom row of regional totals.

Mollweide:
Equal-area pseudocylindrical map projection used for all choropleths (global, regional, and per-nation zooms) to ensure visual area corresponds to geographic reality.

Protection Against Arbitrary Detention:
Arbitrary detention prohibited with legal recourse

R (lever activation score):
Average activation level (0–1) of the nine Right to Life Deficit Index levers. 1 = full activation across all dimensions.

Right to Life:
The overarching protected interest; the nine indicators operationalize equal and effective protection against arbitrary interruption.

RTLDI:
Right to Life Deficit Index — the full framework from the source (Zenodo 10.5281/zenodo.19468550), extended here to quantify capital exclusions (lost potential GDP where capital is excluded because the nine protections necessary for it to operate are absent).

Socioeconomic Conditions:
Access to healthcare, food, and shelter adequate to sustain life

Steady state:
A balanced biological, economic, or social condition that the framework argues is supported or undermined by the strength of the nine life protections and the resulting causal enclosures.

The Nine Levers:
The nine binary institutional conditions (RTLDI) that are averaged to produce R. Low-cost, high-return switches identified through modelling for maximal prosperity.

Torture and Inhumane Treatment:
RTLP indicator #5; one of the larger contributors to global capital exclusions, highlighting physical integrity protections.

Trend (3-year):
The per-nation GDP-driven RTLDI plots (R held fixed at 2024 values) that illustrate recent dynamics in capital exclusions alongside the regional and global maps.

UN region / regional summary:
One of the 22 geographic groupings used for aggregates, focused choropleths, member-nations tables (with R / G0 / population / capital exclusions + REGIONAL TOTAL row), and 9-lever breakdowns.

V-Dem:
Varieties of Democracy project. Supplies the expert-coded governance and civil liberties indicators for eight of the nine RTLP components.

Viridis:
The perceptually uniform sequential colormap (dark low-R → yellow high-R) used consistently for every enclosure-strength choropleth in the atlas.

Code and Atlas Production
RTLDI ATLAS project (2026). The open-source toolkit, crosswalk implementation, data pipeline, and this PDF generator are provided to make the framework usable by NGOs and researchers.

This work is released in the spirit of the original document: to map, with transparent data and reproducible math, the economic consequences of failing to protect the right to life equally.

For the full source code, 2026 data tables, and previous editions (2023, 2024), see the project repository. Users are encouraged to download the latest V-Dem and World Bank releases and re-run the pipeline for updated figures.
