Enclosure Strength (RTLP R) — UN Member States

RTLDI ATLAS 2026 | R = Right-to-Life Protection score (0 = weakest, 1 = strongest)

31 small states are shown with locator points so their country records remain visible and clickable.

R from 8 V-Dem components (crosswalk, year=2024) + 1 World Bank socioeconomic indicator (#9) + 2026-fresh G_0 (GDP per capita current US$). GDP is the more dynamic variable; V-Dem RTLP components use the file's latest available year (2024). $\Delta G = 0.05 \times (1 - R) \times G_0$ per Hubbard (2026V3). Source: 10.5281/zenodo.19468550 | 193 UN Member States.
